

Fault report | acados t renderer not found

Author: Nicolas Hammje

Title: acados t renderer not found

Problem Encountered:

At first usage, acados will ask you if you want to manually download t_renderer. If you choose the automatic option, it fails

Solution Implemented:

Clone the t_renderer git, build it locally, and then go to <tera_renderer_dir>/target/release/t_renderer, move it to acados/bin/t_renderer and voila.
